

Teachers' Survey

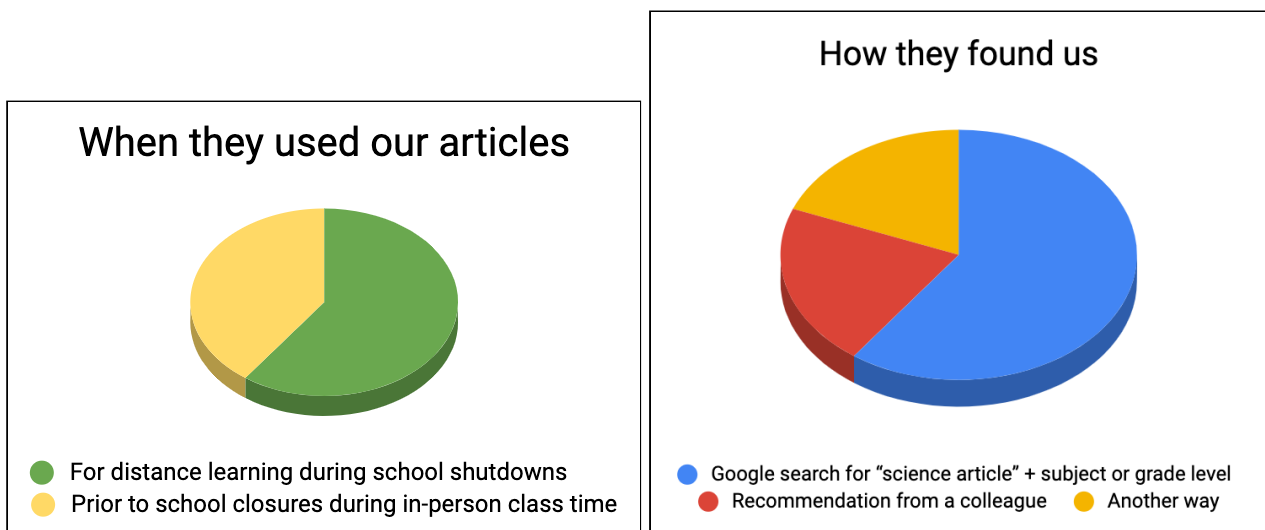

June 2020

Key take away messages

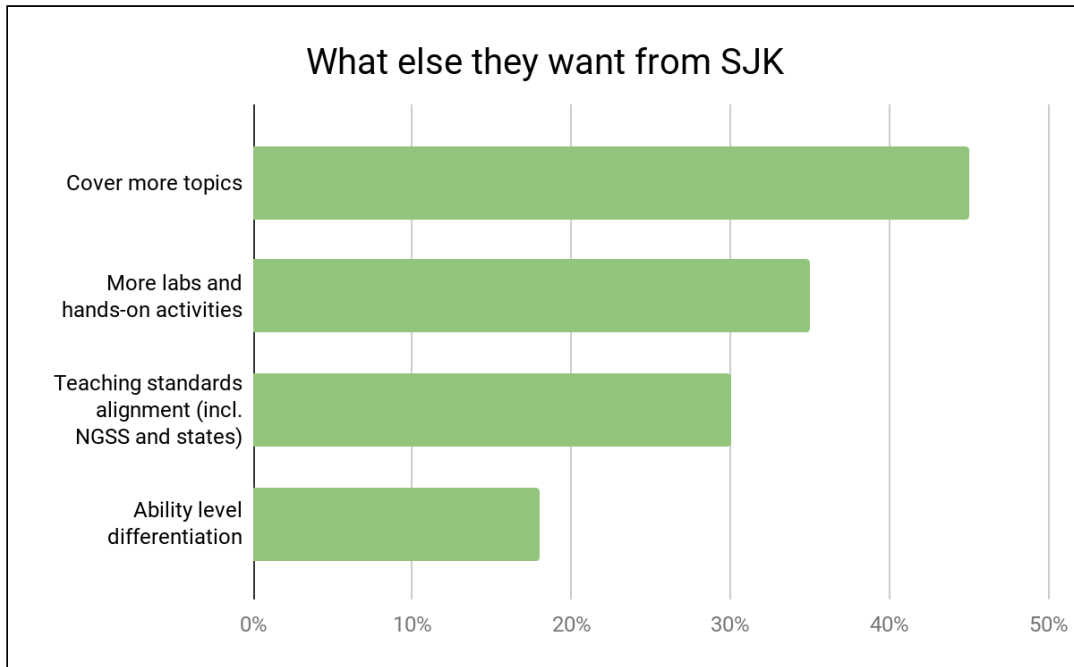

- About the survey:
 - Timing: End-of-school year 2019/2020, after world-wide school shutdowns due to COVID-pandemic.
 - The survey was sent to 1,600 newsletter subscribers
 - 27 responders
- About the responders:
 - All responders were science teachers
 - Included 2 Special Education and 1 Gifted&talented teacher

- 100% of the US-based schools were closed during the pandemic

- Feedback:

- Other ideas:

- Make the articles readable on a mobile phone as many students access the internet only on their phones.
- Pair an older and a more recent article from the same field to illustrate to compare/contrast and to illustrate how science advances.
- More topics that relate directly to teens, such as research on the effects of the use of technology, teen health topics, brain development, etc.
- Increase the range of topics by adapting iconic/famous/old journal papers which changed science.

- General opinion
 - Scale: Disagree (1) - Agree (5)
